00:04

my way mobile storage is a service that

00:07

we provide for those individuals who are

00:10

either moving or needing the store and

00:12

we do that in a unique way that we bring

00:15

the containers to the customer we

00:18

provide moving and storage solutions for

00:21

almost every aspect of a homeowner's

00:24

lifestyle changes whether it's moving

00:27

downsizing or actually needing temporary

00:30

storage we deliver the containers right

00:33

to your driveway it's a most convenient

00:36

way to store anything on a temporary

00:39

basis not only is it mobile that we

00:42

bring the containers out to either a

00:44
residential home or business but we also

00:47
have the ability to bring those items

00:49
back into a secured indoor warehouse for

00:52
them to store sometimes for weeks and

00:54
sometimes it's a permanent situation for

00:56
storing year-round my way mobile storage

01:00
has been absolutely amazing I partnered

01:02
with them to help my clients sell their

01:04
homes what I do is I give each one of my

01:07
clients two of their mobile boxes and

01:10
what they do is they pack up all of the

01:12
things that they have accumulated in

01:14
their home and they can put them in the

01:17
storage pods and then they come and

01:19
collect them and bring them back to the

01:21
climate-controlled warehouse and then I

01:24
bring in professional photography and I

01:26
sell their home looking like a

01:27
professional magazine shoots my mobile

01:31
storage has a great impact on my company

01:33
the reason being is that the storage

01:35
containers are super convenient for my

01:38
client they do not require any trailers

01:41
they do not require any borrow trucks

01:43
they simply just get delivered to the

01:45
driveway the furniture goes directly

01:47
into the containers and then they are

01:49
dropped off at the site I think the

01:53
benefits are you don't have to load up

01:57
all your items unload them at a storage

01:59
unit

02:00
come back later reload them and deliver

02:03
them so it's much easier on the people

02:06
that are volunteering to help you I love

02:08
that you can store your items room by

02:11
room

02:12
when you meet a certain room you can

02:14
have it delivered you know what's in

02:16
that pod you can keep track of it I love

02:19
that if you forget something and it's in

02:21
storage you can call and be able to have

02:25
that pod out and get out what you need

02:27
and just the amazing customer service

02:29
that we've had it's been incredible

02:32
running into homes that have damaged

02:35

basements we need to take a lot of

02:36

people's personal belongings and

02:38

contents out and store them somewhere

02:40

safely and securely and my way mobile

02:43

storage does a great job of providing

02:45

that service for us what they're doing

02:48

is they're picking up all our furniture

02:49

and bringing it over to their

02:51

temperatures own facility and storing it

02:53

for us on our announce season times of

02:56

the year the experience helps us out

02:59

tremendously with our labor we don't

03:02

have to send a go around our schedule to

03:03

try to find somebody to come in and pick

03:06

up are very heavy furniture that my way

03:08

storage will do for us it's a very

03:10

convenient service that they offer I

03:14

think one of the major advantages for my

03:17

way mobile storage we're locally owned

03:19

we live in this community we care about

03:23

the community and that we really treat

03:25

everyone as neighbors we're actually

03:27

having to take care of people's

03:29

belongings that's important role and we

03:33

take that very serious or our people

03:35

take that very serious and so we really

03:37

want to be handling each one of those

03:39

items because we know that's our

03:41

neighborhood and we care about

03:42
